GALLA RISHI

6302509230 | rishigalla29@gmail.com | Hyderabad, Telangana

Summary

Passionate Robotics engineer leveraging Machine Learning and Deep Learning techniques to build intelligent, data-driven robotic systems.

Education

Mahindra University | Hyderabad
Robotics (Currently Pursuing) | 08/2027

Institute of Aeronautical Engineering (IARE) | Hyderabad
CSE (Artif icial Intelligence & Machine Learning) | 06/2025

Narayana Junior College | Vijayawada
XII | 08/2021

St. John's School | Gannavaram
X | 12/2019

Projects

Smart Dustbin – Real-Time Waste Classification using YOLOv8n
2025 – Present | Hyderabad, India
Developed a real-time waste detection and classification system using YOLOv8n for smart waste management applications. Implemented object detection to categorize waste into organic, plastic, and metal classes. Optimized the model for real-time inference performance suitable for smart city environments.

Lost & Found Campus System – Deep Learning Based Item Identification *2023 | Hyderabad, India*
Designed and built a deep learning-based platform to automate identification and matching of lost and found items within a campus. Implemented CNN-based image classification and feature matching techniques to improve item recognition accuracy. Integrated the model with a structured database to streamline reporting and reduce manual verification efforts.
